

The Through-Line: Map Content & CTAs

Assignment Deliverable | Track: General AI Fluency (Week 3)

1. One-Line Claim

"Creating Production-Ready AI Workflows with Robust Backend Architecture."

2. Content Map (Pages → Sections → Cases → CTAs)

Page 1: Home / Portfolio Overview (Landing Page)

1. **Hero Banner:** Displays the One-Line Claim with "View Work" and "Book Intro" buttons.
2. **Lead Case Study (Strongest Work):** SentinAI Guardrail (Real-Time Safety Multi-Agent System).
3. **Secondary Case Grid:** Dynamic PDF RAG Engine & LangGraph Email Drafter.
4. **Tech Stack & Skills:** Python, Java, LangChain, LangGraph, FastAPI, Docker, PostgreSQL.
5. **Developer Philosophy:** Brief note on dynamic, scalable software design.
6. **Footer Banner:** Callout to schedule a call.

Call to Action (CTA): "Book a 15-Minute Intro Chat"

Page 2: Case Study — SentinAI Guardrail (Primary Project)

1. **Overview & Context:** Scope, technology stack, and outcome summary.
2. **The Problem:** Preventing hallucinations and policy violations in production AI.
3. **Multi-Agent Architecture:** LangGraph state flow diagram and logic explanation.
4. **Results & Metrics:** Accuracy improvements, latency metrics, and test results.
5. **Live Demo & Code:** Product walkthrough GIF and GitHub repository link.
6. **Key Insights:** Lessons learned in asynchronous execution and validation.

Call to Action (CTA): "Discuss how this solution applies to your team → [Contact Form]"

Page 3: Case Studies — RAG & Workflow Automation

1. **Dynamic PDF Intelligence Engine:** Streamlit + pg_vector semantic search without hardcoding.
2. **LangGraph Email Drafter:** Multi-step state machine for outreach workflows.
3. **VideoDB Clipping Agent:** High-value video clip extraction system.
4. **Code & Diagrams:** System flowcharts and Python code samples.

Call to Action (CTA): "Explore Code Repositories on GitHub →"

Page 4: Contact & Schedule

1. **Direct Pitch & Scope:** Project consultation availability and collaboration options.
2. **Calendar Embed:** Direct 15-minute Calendly booking widget and simple contact form.
3. **Links:** GitHub, LinkedIn, and Email contact details.

Call to Action (CTA): "Pick a time on my calendar to talk AI integration."

3. "Still Need to Gather" List

- **Live Demo Deployments:** Host working web links for SentinAI Guardrail and PDF RAG pipeline on Vercel / Render.
- **Code Repositories:** Clean up Python codebase, remove secrets, write clear README files, and publish to GitHub.
- **UI Walkthroughs & GIFs:** Capture 10-second high-quality screen recordings of app interfaces.
- **Metrics & Data:** Gather concrete numbers on performance improvements and latency reduction.
- **Architecture Flowcharts:** Export clean system diagrams from Figma or Mermaid.js.
- **Internship Artifacts & Quotes:** Collect completed milestone work and feedback statements.
