

Portfolio Week 03 Deliverables

Student: Shruti Bhare — Identity Kit & Image Curation

PART 1: IDENTITY KIT

1. Typography Selection

Heading Font: Inter (Bold / SemiBold)	Aa Bb Cc 123
Body Font: Inter (Regular / Medium)	Aa Bb Cc 123

2. Color Palette

Background #F9FAFB	Near-Black Text #111827	Subtle Text #6B7280
Tech Accent #4F46E5		

3. Favicon & Brandmark

	Shruti Bhare
Favicon (32×32)	Header Logo Mark

4. Claude Project Style Note

Style Guide: Fonts: Inter (Headings: Bold, Body: Regular). Palette: #F9FAFB (bg), #111827 (text), #6B7280 (subtle), #4F46E5 (accent).
Mood: A minimal, precise, and high-contrast technical system that lets complex AI architecture and case studies speak for themselves.

PART 2: CURATED IMAGE SET

5. Asset Inventory & Mapping

Real Photo

Headshot

Hero Portrait

Authentic profile photo establishing personal connection and recruiter trust.

Real Capture

AI Platform UI

AI Learning Platform

Clean UI capture showing live code execution and automated feedback.

Real Capture

Workflow Visualizer

Email Bot Workflow

LangGraph Studio visualizer DAG displaying state machine logic.

AI Pattern

Texture

Background Mesh

Subtle low-opacity vector grid pattern matching identity kit colors.

6. Discernment & Rejection Note

Why Real Captures Over AI Stand-ins:

AI-generated software interfaces look synthetic and contain fake syntax upon inspection. Utilizing real high-resolution screenshots of active code execution, LangGraph workflows, and vector storage pipelines provides genuine proof of engineering execution.

Rejected Asset Analysis:

Asset: glowing_3d_neural_network_sphere.png (AI Generated)

Reason: The initial concept yielded glowing neon particle trails and hyper-detailed 3D nodes. While visually striking, it violated the core style note rule: *the background must*

frame the work, not compete with it. It distracted from project descriptions and felt like a generic stock template. I rejected it in favor of a flat, minimal vector grid pattern.
